Our Services

Custom Design & Development

Our in-house design team provides free 3D modeling and CAD support to bring your packaging vision to life. We work closely with brands to create unique, market-ready designs.

OEM & ODM Solutions

We offer flexible OEM and ODM manufacturing services, accommodating custom colors, logos, surface treatments (UV coating, hot stamping, silk screen printing, frosting), and unique shapes.

Sample Development

Rapid prototyping with sample delivery in 7-15 days. We provide both standard and custom samples for your evaluation before mass production.

Quality Assurance

Every product undergoes rigorous quality testing including dimensional checks, leak testing, compatibility testing, and visual inspection to ensure the highest standards.

Global Logistics

We handle all export documentation, customs clearance, and arrange reliable worldwide shipping via sea, air, or express courier with full insurance coverage.

One-Stop Development Process

01 — Product Design: Innovative concepts tailored to your brand identity and target market.

02 — Engineering & 3D Modeling: Precision 3D modeling and technical drawings for perfect functionality.

03 — 3D Prototyping: High-quality prototypes and samples to validate your design before tooling.

04 — Testing & Validation: Rigorous testing to ensure quality, safety, and performance standards.

05 — Mass Production: Efficient production with strict quality control at every stage.

06 — Delivery & After-Sales: Reliable global shipping with dedicated after-sales support.

Why Choose AFS Packaging
